

148-14615-1 – Spiral Protective Coils

Description

May be applied to hoses in the field by spirally wrapping or winding around the hose. The natural gap between coils reduces the possibility of entrapped moisture. One size covers hose sizes through -20.

Installed gap of 0.250 recommended.

Available Options:

White TFE spiral protective coil is resistant to most oils, fuels and acids. Temperature range of -450°F to +500°F.

Black Nylon spiral protective coil resistant to most oils, fuels and weak acids. Temperature range -145°F to +230°F.
