

Dual Timekeeper

Description

Introducing Bearon Aquatic's new Dual Timekeeper (PN #26102).

Our weather-sealed steel cabinet offers two 115V timers so you can independently control two devices, such as your water feature and lights. The unit is 100% pre-wired with a 5' Pigtail (male) plug and two 115V female connectors for use with your fountain, lighting, pool, or water irrigation system.

Each timer can be set in 15-minute increments, has a manual override switch, and offers you the ability to set two start/stop times.

The Dual Timekeeper is the perfect addition to control your Bearon Aquatics products or a variety of other spa or pool equipment like lights, heaters, signs, pumps, aerators, fountains, or filters with a 15 amp rating.

Reduce your utility costs and extend the life of your equipment by using this timer.
