

FG1000/150 – 1 HP Horizontal Flow Aerator

Description

- Aerators create a strong turbulent current providing more surface area to diffuse oxygen.
- They are vital in protecting ponds from mosquitos, unwanted bacteria, algae bloom & turnover resulting in winter and summer fish kills.
- Also, excellent devices for duck hunting. The current created will keep the landing zone from freezing and rock the decoys, attracting live birds to the area.
- Aids in cleaning out marinas, narrow canals, and any other area where unsightly & odorous debris can collect.
