

Flo-Gen 750/150

Description

Flo-Gen is the latest addition to Bearon Aquatics's line of reliable, energy-efficient, and durable aeration equipment.

Flo-Gen was designed by adopting and simplifying aspects from Flo-Ration, our 3-in-1 aeration system. Unlike its predecessor, the Flo-Gen comes in 2 sizes (0.75 HP or 1 HP); both are a single propeller unit strictly dedicated to horizontal flow.

Why Choose Flo-Gen?

A fraction of the cost of competitors' models.

Creates a strong turbulent current providing more surface area to diffuse oxygen.

Aids in cleaning out marinas, narrow canals, and any other area where unsightly and odorous debris can collect. Vital in protecting ponds from mosquitos, unwanted bacteria/algae bloom, and turnover resulting in winter and summer fish kills.

Constantly mixes water layers, effectively keeping temperatures more consistent throughout the waterway.

Excellent for duck hunting. The current created will keep the "honey hole" from freezing, and rocks the decoys, attracting live birds to the area.

3-year limited warranty
