

MODEL F500F/050: AERATING FOUNTAINS

Description

Keeping our principles for efficiency and sustainable aquatic life in place, Bearon Aquatics offers an alternative for those who prefer aesthetics as much as efficient aeration. Our F-Series Aerating Fountains provide excellent aeration to any lake or pond while displaying a stunning circular-V shaped pattern. Throwing large goblets of oxygen-depleted water as high as 6' up and as far as 21' out helps expose it to air and transfers it to areas in the pond that are also low on oxygen. For those keeping a close eye on operating costs, these fountains are comparable to many on the market but use half of the electrical power as most. These lightweight and rugged models can operate in water as shallow as 14". In addition, the beauty of either of these models can be enhanced by our LED Fountain Light Sets.
