

PDL-SGL-A/G – Signal Paddles

Description

The signal paddles are two similar paddles with a square plastic surface and a polypropylene handle. One paddle has a red colored surface on one side and a green colored surface on the opposite side. The other paddle has a green colored surface on one side and an amber colored surface on the opposite side. Operating signals are provided on the surfaces of each paddle. The paddles are used to visually signal and direct operations during unrep.
