

ST-JNT/SW-S/P/REC – Receiver Swivel Joints – Single Probe

Description

The single probe receiver swivel joint assembly consists of a swivel joint, a conventional link adapter, and an inhaul padeye. In conjunction with the swivel arm, it is required as the means of attaching the single probe receiver to a ship's supporting structure. The swivel joint and inhaul padeye are attached to the ship's supporting structure by welding, bolting or riveting. The swivel joint assembly may also be used with other fueling at sea systems by using the conventional link adapter.
