

WEEDS AWAY: W750/025

Description

Protect your swimming area, marina, or dock from muck

Bearon Aquatics is proud to present Weeds Away! Operating in as little as 2' of water, Weeds Away is designed to create a continuous current of water. This current will, like a natural water current, move weeds, muck, silt, surface and suspended debris away from wherever it is pointed.

Point the blower up toward the surface of the water and turn it into an aerator. The current created by the blower also prevents fine silt and sediment particles from settling near your swimming area, marina or near your dock which ultimately forms muck.

Energy-efficient, simple installation and customer-friendly

Weeds Away comes with a quick-disconnect power cord and a dock mounting kit (1" x 6" steel pole not included).
