Hydrasearch In The Making

Hydrasearch began in the early 1960s from a growing demand for more “think tank” factories near Washington, D.C. to support our national defense. From hydraulic research and design to our most recent acquisition of venting solutions, our product offering has been an expanding effort to fulfill the needs of our customers. We are proud to manufacture a trusted product offering for over 60 years.

1962

Hydrasearch is founded by Willard G. Triest in Annapolis, MD, specializing in the research and manufacturing of hydraulic valves and component devices.

1970s

Hydrasearch primary focus during the 70s was designing hydraulic control systems for the government and fueling at sea equipment for the US Navy.

1994

Hydrasearch relocated to Stevensville, Maryland. The new 30,000 square foot facility allowed Hydrasearch to merge its inventory, machining, testing and offices under one roof.

1960s

Hydrasearch is acquired by Dixon Valve & Coupling Company, a leading innovator in the hose coupling industry for over 100 years.

1980s

Hydrasearch developed and tested a new line of hose and fittings that solved many ongoing leakage problems. This led to Hydrasearch being a Naval Sea Systems Command for Qualified Product Listing (QPL) vendor in 1989.

1995

Hydrasearch purchased Technical Products. This acquisition established Hydrasearch as an even larger supplier to the military market.

Hydrasearch In The Making

1998

Hydrasearch aquired the field attachment hose and fitting product line from Deutsch Metal Components of Gardena, CA. The product line consists of rubber hose assemblies and components.

2010

Hydrasearch merged with Buck Algonquin under the name Hydrasearch Company, Inc. This merger brought an expansion into the maritime market.

2016

Hydrasearch acquired Arctic Steel Water Strainers and Pro-Mar Maritime Venting Solutions. These acquisitions expanded our product offering into the workboat industry.

2000

Hydrasearch received its first ISO 9001 certification. The registration is recognized as a measure of a supplier's quality assurance process.

ISO 9001:2000

2016

Hydrasearch relocated to its current facility within the same business park in Stevensville, MD. The facility is 65,000 square feet allowing for increased efficiency and production.

Hydrasearch Capabilities

Hydrasearch Company, LLC (Stevensville, MD) has been an established leader in manufacturing for the maritime industry since 1962. We specialize in manufacturing venting solutions and commercial marine hardware for the workboat industry. We are proud to say that many of our products are ABS approved. Our mission is to provide quality products and excellent customer service.

Advantages of buying Hydrasearch

ABS Approved

Many of our product offerings are ABS approved.

Quality Assurance

Hydrasearch maintains a mature quality control process that puts us ahead of the competition in the marine hardware industry. Our Quality Management System is driven by our listing as a preferred vendor (QPL) to the US Navy. To ensure our quality, we are continuously improving our equipment, processes and training.

In addition, we are a certified International Standards of Operation (ISO 9001: 2015) company and have a type certification to the the Royal Institution of Naval Architects (RINA).

Engineering Support

Hydrasearch has an extensive support system that include the following programs:

- 3D printing
- Coordinate Measuring Machine (CMM)
- Finite element analysis
- Flow simulation
- Fully staffed quality department
- In house chemical analysis for metals
- Modern machine shop
- Multiple CAD software support
- Rapid prototyping
- Solidworks capabilities

Hydrasearch Capabilities

Workboat Applications:

- Barges
- Cargo vessels
- Defense vessels
- Offshore oil rigs
- Offshore support vessels (OSV)
- Passenger vessel operations
- Tugs and towing

Industry Terms

AFFF

Aqueous Film Forming Foam (AFFF) is a type of fire suppressant agent

Anodize

A type of coating with a protective oxide layer by an electrolytic process in which the metal forms the anode

ANSI

American National Standards Institute (ANSI) oversees the development of voluntary consensus standards

AQ-22

A corrosive resistant stainless steel material which has increased resistance to crevice corrosion compared to Stainless Steel (316) and Monel (400) material

Butt weld

A welding technique used to join two components together without overlapping the ends

Cadmium (CAD) plating

A type of coating process that offers technical benefits such as outstanding corrosion resistance

Casting

An object made by pouring molten metal or other material into a mold

Check valve

A valve that allows fluid to flow in only one direction

Domestic

A product that is manufactured within the USA

Durometer

An instrument for testing the hardness of various plastics and rubbers

Extrude

A process to shape a material, metal or plastic, by forcing it through a die

Fluorocarbon (*viton*)

A synthetic rubber and fluoropolymer elastomer commonly used in O-rings and other molded or extruded products

Forge

A process involving the shaping of metal using localized compressive force

Galvanize

A type of coating with a protective layer of zinc

Gooseneck

A pipe curved like a goose's neck used on inverted vent check valves typically found on the deck of a vessel

GPM

Gallons per minute

JIC

A type of flare fitting machined with a 37° or 45° flare seating surface

Marine rated

A product's ability to withstand elements associated with marine environments

Non-domestic

A product that is manufactured outside of the USA

Nitrile (*Buna-N*)

A synthetic rubber copolymer of acrylonitrile (ACN) and butadiene commonly used in O-rings and gaskets

NPS

National Pipe Straight Thread

NPT

National Pipe Taper Thread

Passivate

A process of coating with inert material to protect it from contamination

Polyethylene (PE) (*composite*)

A type of plastic that is made of a versatile material

Powder coat

A type of coating that is applied as a free flowing, dry powder

PSI

Pounds per square inch

Sil-braze

A joining process in which two or more metals are joined together by melting and flowing a filler metal into the joint

Socket weld

A welding technique in which a pipe is inserted into a recessed area of a valve, fitting or flange

Zinc plating

A process where zinc is applied by using a current of electricity

Hydrasearch Naming Convention

- The below part number convention covers standard items
- Any non-standard items (i.e. float options, add-on closing device, etc) will have additional extensions on the part number
- Part numbers beginning alphabetically do not follow the below convention

Size (inches)	Series	Material	Connection
1.5"	APH-A (aluminum air pipe head) ¹	A (aluminum)	F (flanged)
2"	APH (air pipe head)	B (bronze)	S (socket weld)
2.5"	PM1 (inverted vent check valve)	GS (galvanized steel)	T (threaded)
3"	DD (deck drain)	SS (stainless steel)	W (butt weld)
4"	DD21 (2:1 ratio deck drain)		SIL (sil-brazed)
5"	DDXH (heavy wall deck drain)		
6"	ST (sounding tube)		
8"	SMB (suction bellmouth)		
10"	SSB (suction strainer box)		
12"			

Notes

- 1 The APH-A option does not require an additional "A" notation when creating the part number.

Legal Policy Information

Warranty Policy

Right to warn

In order to ensure proper function of products, it is strongly recommended that each part is inspected and serviced monthly. Inspection should include, but is not limited to, visible damage, excessive wear and proper bonding. Failure to properly maintain your product may result in catastrophic failure and/or loss of life.

Warranty

Hydrasearch Company, LLC (herein called "Hydrasearch") warrants the products described herein, and manufactured by Hydrasearch to be free from defects in material and workmanship for a period of one (1) year from the date of shipment by Hydrasearch under normal use and service. Hydrasearch's sole obligation under this warranty is limited to either repairing or replacing, as hereinafter provided, at its option, any product found to Hydrasearch's satisfaction to be defective upon examination by it, provided that such product shall be returned for inspection to Hydrasearch's factory within thirty (30) days after discovery of the defect.

The repair or replacement of defective products will be made without charge for parts or labor. This warranty shall not apply to parts or products not manufactured by Hydrasearch, the warranty of such items being limited to the actual warranty extended to Hydrasearch by its supplier.

This warranty shall not apply to any product which has been subject to abuse, negligence, accident or misapplication or to any product which has been altered or repaired by anyone other than Hydrasearch nor to normal maintenance services and the replacement of service items (such as washers, gaskets and lubricants) made in connection with such services.

To the extent permitted by law, this limited warranty shall extend only to the buyer and any other person reasonably expected to use or consume the goods who is injured in person by any breach of warranty. No action may be brought against Hydrasearch for an alleged breach of warranty unless such action is instituted within one (1) year from the date the cause of action accrues. This limited warranty shall be construed and enforced to the fullest extent allowable by applicable law.

Other than the obligation of Hydrasearch expressly set forth herein, Hydrasearch disclaims all warranties, expressed or implied, including but not limited to any implied warranties of merchantability or fitness for a particular purpose, and any other obligation or liability. The foregoing constitutes Hydrasearch's sole obligation with respect to damages, whether direct, incidental or consequential, resulting from their use or performance of the product.

Proposition 65 Warning

Hydrasearch Company, LLC is in compliance with the California Safe Drinking Water and Toxic Enforcement Act of 1986 and its supporting regulations ("Proposition 65"). Accordingly, Hydrasearch will defend and indemnify our customers if there is a claim made under Proposition 65 for listed chemicals being contained in its products, so long as our customers provide the warning per the instructions below. Hydrasearch provides warnings that comply with the current Proposition 65 regulations and the amended regulations which took effect August 30, 2018.

All Hydrasearch products are shipped in cartons with the following warning:

 **WARNING:** Cancer and Reproductive Harm - www.P65Warnings.ca.gov."

If you sell or distribute Hydrasearch products to California consumers, or to other persons or entities that may sell such items to California consumers, in quantities fewer than a full carton, you must provide this warning to each customer, either by labeling each unit with the above warning or by another method.

If you would like more information about the chemicals contained in Hydrasearch products, please visit our website at www.hydrasearch.com. Many product display pages contain information about the chemicals contained in our products.

Hydrasearch products made of brass may not be sold to California consumers unless such fittings either contain less than 300 PPM of lead when analyzed pursuant to the EPA test method 3050B or equivalent or they are sold or distributed with a clear, reasonable and conspicuous warning. So long as it is prominently displayed on the product or the packaging of the product, the following warning complies for brass fittings:

"WARNING: This product contains a chemical known to the State of California to cause birth defects or other reproductive harm. Do not use in connection with drinking water. Wash hands after handling."

There are significant penalties associated with failure to comply with Proposition 65 requirements. Should you need further explanation or assistance in complying with this notice, please do not hesitate to **contact us at compliance@hydrasearch.com**.

Legal Policy Information

Return Policy

Contact your Hydrasearch Company, LLC customer service representative (information below) to obtain a Return Material Authorization (RMA) form. Original invoice number, purchase order number and date must be provided. Product returned without an RMA number may be refused or returned at the customer's expense. Hydrasearch is not liable for unauthorized returns.

Return Material Authorization (RMA)

- Authorization must be obtained prior to return
- RMA expires thirty (30) days from date issued
- One carton must include a copy of the RMA form to ensure prompt evaluation and possible credit on return
- Returned merchandise transportation must be prepaid
- Merchandise must be packed well to avoid damage during transit
- All cartons must be marked with authorized RMA number (unmarked shipments will be refused by our receiving department)
- Returned goods should be shipped to the following address:

Hydrasearch Company, LLC
Returned Good Dept. RMA # _____
203A Log Canoe Circle
Stevensville, MD 21666

Nonconforming Products

- All product will be inspected and processed by our quality department for disposition
- Products shipped in error and/or product deemed nonconforming will be credited at the invoice price paid including freight charges for these items

Restocking/Unwanted Products

- All product will be inspected and processed by our quality department for disposition
- Restocking charge will apply at a minimum of 25% for all product returned for any other reason than Hydrasearch shipping and/or nonconforming errors
- Product returned damaged/broken will be credited at a scrap value only
- Product returned to Hydrasearch must be prepaid freight at the responsibility of the customer
- Non-inventory product may or may not be authorized for return, based solely on the inventory requirements of Hydrasearch
- Orders that do not have standard requirements, are not eligible for return (*unless product is found to be nonconforming by our quality department*)
- Shaft Couplings must be in original, sealed cartons and in salable condition

Claims

- Claims for damage or loss in transit must be made by customer directly against the carrier. Hydrasearch is not responsible for freight damage
- Photographic evidence is required for all claims
- All claims for defective product or deficient orders must be made in writing by customer within thirty (30) days of receipt

APH-A Series (aluminum)

- Prevents seawater from entering tanks
- Allows air/vapor to escape when tank is filling
- Allows air intake when tank is discharging
- Vertical orientation is ideal for reducing weight and eliminates the need for a gooseneck pipe bend

Specifications

Construction	Cast aluminum housing
Hardware	Stainless steel
Nitrile seal (Buna-N)	Maximize low pressure sealing Oil and fuel resistant
Flange holes	Oblong; to accommodate ANSI B16.5 and DN PN10/16 flange mount dimensions
Float	Full round High density polyethylene (HDPE)
Screen	30 mesh Corrosion resistant for ignition protection Easily accessible for maintenance Design allows for closing option with screen in place
Seal retaining ring	Easy replacement of valve seal
Cap	Top mounted
Closing device	Optional
Compliances	ABS

Dimensions

APH-A Series (aluminum)

Example: 2-APH-A-F-R

Part No.	A (size)	B	C	D	E	Approximate weight (pounds)	Max inlet air speed (m/s)	Inlet air flow rate at max inlet air speed (m ³ /hr)	Flow rate at 3.625 PSI (GPM)
2-APH-A-F-R	2	8.63	5.5	6	6.75	7	12.4	90	95
2.5-APH-A-F-R	2.5	9.25	6	7	7.63	9	19.6	223	120
3-APH-A-F-R	3	10.5	6.5	7.5	8.75	11	21.8	358	178
4-APH-A-F-R	4	12.38	8	9	10.5	16	18.7	546	288
5-APH-A-F-R	5	14.75	10	10	12.25	25	19.2	875	420
6-APH-A-F-R	6	16.25	11.63	11	13.25	33	12.8	838	680
8-APH-A-F-R	8	21.25	14.63	13.5	17.25	56	-	-	-
10-APH-A-F-R	10	27.25	18.13	16	22.25	104	-	-	-
12-APH-A-F-R	12	31	22.13	19	25.25	151	-	-	-

Note: All dimensions are in inches and are for reference only

Air intake tested with polyethylene float (lightest float) and the water pumped through the air pipe head for the flow rate

Ordering Note: To order the threaded option replace the “F” with a “T” in the part number, example: 2-APH-A-T-R
 To order a closing device add “-C” to the end of the part number, example: 2-APH-A-F-R-C

Pressure Loss vs Flow Rate

APH Series (steel)

- Prevents seawater from entering tanks
- Allows air/vapor to escape when tank is filling
- Allows air intake when tank is discharging
- Vertical orientation is ideal for reducing weight and eliminates the need for a gooseneck pipe bend

Specifications

Construction	Cast housing, 2 - 4 inch Fabricated, 5 - 12 inch Recessed cap; eliminates catch points (fabricated) Internal housing is removable for easy maintenance
Hardware	Stainless steel
Nitrile seal (Buna-N)	Maximize low pressure sealing Oil and fuel resistant
Flange holes	Oblong; to accommodate ANSI B16.5 and DN PN10/16 flange mount dimensions
Connection	Flanged - standard
Float	Full round Stainless steel - standard High density polyethylene (HDPE) - option
Screen	Corrosion resistant for ignition protection Easily accessible for maintenance
Cover	Downward facing; aids in the containment of overflows
Closing device	Optional upon request
Compliances	ABS

Dimensions

Ordering Information

Example: 2-APH-GS-F-C-P

Size (inches)	Series	Material	Connection	Construction ¹	Float option ²
2	APH (air pipe head)	GS (galvanized steel)	F (flanged)	C (cast housing)	P (polyethylene)

2.5	DD21 (2:1 ratio) ²	SS (stainless steel 316)	W (butt weld)	SS (stainless steel 316)
3				
4				
6				

Notes

- 1 Only available in 1.5, 2 and 2.5 inch
- 2 Only available in 2 and 3 inch
- 3 Only available on the Standard series (DD) in the 1.5 and 2 inch size

Suction Bellmouths

- Designed for use in ship bilges to help with final stripping of liquid cargo tanks
- Prevents vortex and gas formation
- Minimizes hydraulic loss while pumping liquids
- Flush without shutting down

Specifications

Construction	Fully cast carbon steel (1025)
Open area ratio	1.5:1 open area ratio to pipe size
Connections	Butt weld (beveled end) and flanged

Dimensions

Product Specifications and Ordering Information

Example: 3-SBM-O-W

Part No.	A (size)	B	C	D	E	Approximate weight (pounds)
3-SBM-O-W	3.5	5	11.75	5.5	0.44	7
4-SBM-O-W	4.5	6.75	15.25	6.75	0.5	13
5-SBM-O-W	5.56	8.38	19.25	8.25	0.63	21
6-SBM-O-W	6.63	10	23.25	10	0.75	34

10-SBM-O-W	10.75	16.75	39	16.75	1.25	122
12-SBM-O-W	12.75	20	45.38	21.38	1.5	174

Note: All dimensions are in inches and are for reference only

Sounding Tubes

- Provides a watertight closing device, which is accessible under normal operating conditions to enable sounding of the tanks

Specifications

Hardware	Stainless steel
Connection	Socket weld
Threaded plug	Bronze (B62) - standard Venting grooves allow venting without fully removing the plug Tether chain
Nitrile gasket	Oil and fuel resistant
T-wrench	Galvanized steel, part number ST-W (sold separately)
Square size	0.75 inch x 0.75 inch

Dimensions

Product Specifications

A (size)	B	C	D	Plug thread (NPSM)	Approximate weight (pounds)
1.5	3.75	1.75	2.95	2 - 11.5	4.5
2	3.75	1.75	2.95	2 - 11.5	4.5
2.5	4.75	1.75	4.06	3-8	6.5
3	4.75	1.75	3.8	3-8	6.5

Note: All dimensions are in inches and are for reference only
Weight is based on the stainless steel material and may vary with different material

Ordering Information

Example: 1.5-ST-A-SS

Size (inches)	Item	Body material	Threaded plug option ¹
1.5	ST (sounding tube)	A (aluminum 535)	SS (stainless steel 316)
2		GS (galvanized steel)	
2.5		SS (stainless steel 316)	
3			

Notes

- The standard option (Bronze B62) does not require a notation when creating the part number.

Pipe Caps

- Not intended for pressure applications
- For debris and thread protection only

Specifications

Construction	Pin lug Chain included
---------------------	---------------------------

Product Specification and Ordering Information

Example: FC150

Part No.	Size (inches)	Body material	Thread	Weight (pounds)
FC150	1.5	cast brass	NPSH	0.40

Arctic Steel Strainers

- Cast stainless steel water strainers
- Cast with duplex stainless steel (2205) for an exceptional level of corrosion resistance
- Designed to create a swirl action to quickly scavenge air while maximizing full height of the basket

Specifications

Construction	Duplex stainless steel (2205) Electro polishing - AISI cast stainless steel (2205)
Hardware	Stainless steel Five (5) wing nuts - no tools required
Basket	ABS, plastic standard on 1", 1.25" and 1.5" Stainless steel (316) standard on 2", 2.5", 3" and 4"
Thread	SISO - offset inlet and outlet, FNPT threaded BISO - MNPT thread inlet and FNPT thread outlet for 1 - 2 inch options BISO - FNPT thread inlet and FNPT thread outlet for 2.5 - 6 inch options BISO - BSP or NPT threads available
Lid	Solid electro polished stainless steel - standard Clear interchangeable polycarbonate lid - option Easy access for maintenance

Dimensions

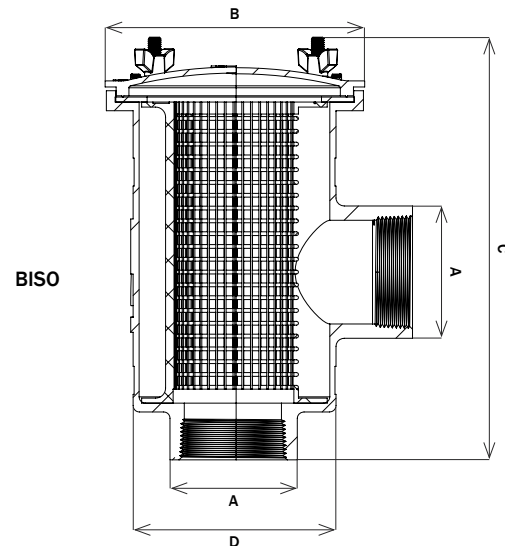

Ordering Information

Example: 70WS-BISO-100-C

Item	Orientation	Pipe size ¹	Lid Option
70WS (strainer)	BISO (bottom in side out)	100 (1 inch)	C (clear)
	SISO (side in side out)	125 (1.25 inch)	S (solid)
		150 (1.5 inch)	
		200 (2 inch)	
		250 (2.5 inch)	
		300 (3 inch)	
		400 (4 inch)	
		600 (6 inch) ²	

Notes

- 1 See basket specification for basket material standards determined by size
- 2 Only available with the BISO orientation

Pressure Loss vs Flow Rate

Note: All flow rates calculated using a clean ABS basket

Cast Iron Threaded Foot Valves

- For use on water suction hoses
- Prevents pump from losing its prime

Specifications

Construction	Painted cast iron
Hardware	Stainless steel
Replacement parts	Seat plates Strainer Valve

Product Specification and Ordering Information

Example: DFVS20

Part No.	Material	Size (inches)	Thread	Weight (pounds)
DFVS20	painted cast iron	1.5	NPT	3.1
DFVS25	painted cast iron	2	NPT	5.41
DFVS30	painted cast iron	2.5	NPT	6.98
DFVS35	painted cast iron	3	NPT	9.49
DFVS40	painted cast iron	4	NPT	15.52
DFVS60	painted cast iron	6	NPT	37.8
DFVS80	painted cast iron	8	NPT	85.1

Note: All dimensions are in inches and are for reference only

valve

valve seat plate

strainer

strainer seat plate

Warning

For water service only
Must be installed in the vertical position

Spring Loaded Check Valves

- Soft seat for bubble tight shutoff
- Spring loaded for fast seating action
- Flow profile designed to minimize head loss

Specifications

Construction	Brass
Strainer	Stainless steel
Cracking pressure	0.5 PSI
Seat	NPR
Pressure rating	0.5 inch - 2 inch; 400 PSI WOG 3 inch - 4 inch; 175 PSI WOG
Temperature range	10°F - 210°F (-10°C - 100°C)

Product Specification and Ordering Information

Example: BVFS20

Part No.	Material	Size (inches)	Thread	Weight (pounds)
With strainer				
BVFS20	brass	1.5	female NPT	1.97
BVFS25	brass	2	female NPT	2.4
BVFS35	brass	3	female NPT	7.81
BVFS40	brass	4	female NPT	12.395
Without strainer				
CV050	brass	0.5	female NPT	0.3375
CV075	brass	0.75	female NPT	0.52
CV100	brass	1	female NPT	0.75
CV125	brass	1.25	female NPT	1.18
CV150	brass	1.5	female NPT	1.63
CV200	brass	2	female NPT	2.34
CV300	brass	3	female NPT	6.73
CV400	brass	4	female NPT	12.08

Note: All dimensions are in inches and are for reference only

Gate Valves

- For use with non-shock cold water, oil or gas
- Adjustable packing nut
- Non-rising stem

Product Specification and Ordering Information

Example: BGV25

Part No.	Thread (female)
BGV25	1/4 NPT
BGV38	3/8 NPT
BGV50	1/2 NPT
BGV75	3/4 NPT
BGV100	1 NPT
BGV125	1 1/4 NPT
BGV150	1 1/2 NPT
BGV200	2 NPT
BGV250	2 1/2 NPT
BGV300	3 NPT
BGV400	4 NPT

Note: All dimensions are in inches and are for reference only

Specifications

Construction	Brass
	Iron handwheel
	Threaded bonnet
	Integral seat Solid wedge disc
Pressure rating	200 PSI WOG, cold non-stock

Domestic Full Port Ball Valves

- Full port
- Adjustable packing
- Blow-out proof stem
- Vacuum service to 29 inches Hg

Product Specification and Ordering Information

Example: BBV75FP

Part No.	Port	Thread (female)
BBV75FP	full	3/4 NPT
BBV100FP	full	1 NPT
BBV125FP	full	1 1/4 NPT
BBV150FP	full	1 1/2 NPT
BBV200FP	full	2 NPT

Note: All dimensions are in inches and are for reference only

Specifications

Construction	Machined solid chrome-plated ball
	RPTFE seats and stem packing
	Bronze casting
Pressure rating	600 PSI WOG
Saturated steam pressure	150 PSI

Wye Valve - 1/4 Turn Ball

- For use with water only
- Operates easily under high pressure

Product Specification and Ordering Information

Example: S7337S

Part No.	Material	Inlet (female)	Outlet (male)	Weight (pounds)
S7337S	cast brass	2.5 NST (NH)	1.5 NPSH	12.06

Note: All dimensions are in inches and are for reference only
Handles are not field replaceable

Specifications

Construction	Cast brass Rocker lug swivel
Operating pressure	175 PSI at 70°F (21°C)
Certifications	Meets NSN specifications #4210-00-255-0234

Global Angle Valves

- UL Listed
- Factory mutual approved
- Available with a polished or chrome finish

Dimensions

Specifications

Construction	Body - cast, yellow DZR brass alloy Hand wheel - aluminum
Working pressure	300 PSI at 70°F (21°C)

Product Specification and Ordering Information

Example: AV150-I

Cast Part No.	Polished Part No.	Chrome Part No.	Size (inch)	Thread	A	B	C (closed)	C (open)	D	E	Weight (pounds)
AV150-I	AV150-I-P	AV150-I-C	1.5	female NPT inlet, male NH outlet	4.13	3.75	6.8	7.78	2.25	1.81	4.4

Note: All dimensions are in inches and are for reference only

Industrial Wash Down Nozzles

- Delivers 30° - 60° - 90° fog pattern
- Shutoff - straight stream - fog
- Supplied with bumper
- For water use only

Specifications

Construction	Brass
Pressure rating	100 PSI at 70° F (21° C)

Product Specification and Ordering Information

Example: WDN150

Part No.	Size (inches)	90° spray (GPM at 100 PSI)	Thread	Weight (pounds)
WDN150	1.5	88 (+/- 12)	NPSH	1.4
WDN150NST	1.5	88 (+/- 12)	NST (NH)	1.4

Note: All dimensions are in inches and are for reference only

Fog Nozzles

- Shutoff - straight stream - fog
- Bumper option

Specifications

Construction	Polycarbonate
Hardware	Brass stem
Pressure rating	100 PSI at 70° F (21° C)

Product Specification and Ordering Information

Example: FNB75GHT

Part No.	Part No. (without bumper)	Size (inches)	Thread	90° spray at 100 PSI (GPM)	120° spray at 100 PSI (GPM)
FNB75GHT	-	0.75	GHT	30.9	8
FNB75S	-	0.75	NPSH	30.9	8
FNB100S	FN100S	1	NPSH	30.9	11.4
HGB100S	-	1	NPSH	30.9	-
FNB150S	FN150S	1.5	NPSH	83.6	-

FNB150NST	FN150NST	1.5	NST (NH)	83.6	-

Note: All dimensions are in inches and are for reference only

US Coast Guard Approved AFFF/Water Fog Nozzles

- Designed for maximum efficiency with AFFF (Aqueous Film Forming Foams)
- Ideal for use in shipyards, offshore rigs and industrial applications

Specifications

Construction	Brass
Pressure rating	100 PSI at 70°F (21°C)
Handle	Zytel (nylon) horseshoe
Stream	Double row of molded prongs Flushes without shut down
Gaskets	Gaskets are special order, contact factory

Product Specification and Ordering Information

Example: CGSN150

Part No.	Description	Thread	Fog flow (GPM at 100 PSI)	Approval No.
CGSN150F	nozzle	1.5 NST (NH)	95	162.027/13/0
CGSN151F	nozzle with pistol grip	1.5 NST (NH)	95	162.027/14/0
CGSN150S	nozzle	1.5 NPSH	95	-
CGSN151S	nozzle with pistol grip	1.5 NPSH	95	-

US Coast Guard Approved Fog Nozzles

- Designed to U.S. Coast Guard specifications for fighting fires with draft water
- Required equipment for all commercial vessels under US registry

Specifications

Construction	Brass
Pressure rating	100 PSI at 70°F (21°C)
Thread	NST

Product Specification and Ordering Information

Example: CGN150NST

Part No.	Size (inches)	Thread	Fog flow at 100 PSI (GPM)
CGN150NST	1.5	NST	55
CGN250NST	2.5	NST	108

Note: All dimensions are in inches and are for reference only

International Shore Connections

- Makes possible the connection of two different threads between ship and shore or between ships
- Meets US Coast Guard specifications for vessels 1000 gross tons or more

Specifications

Construction	7 inch OD brass flange with 4 ³ / ₄ inch holes Solid wedge disc with tapered seats
Hardware	Eight (8) washers Four (4) hexagon brass nuts Four (4) hex head bolts One (1) washer and one (1) fiber gasket
Thread	NST (NH) - standard NPT and NYFD thread - option
Working pressure	300 PSI - shore side 300 PSI - ship side

Product Specification and Ordering Information

Example: 09-318-00001

Part No.	Material	Thread	Description
09-318-00001	brass	NST (NH)	shore side
09-319-00001	brass	NST (NH)	ship side

100R5 Hydraulic Fittings

- Field attachable fittings for 100R5 hydraulic hoses
- These 37° flared JIC fittings can be used for a 45° connection
- Ideal for use in repairs at sea and require minimal tooling

Specifications

Construction	3-piece Brass or stainless steel Includes nut, nipple and socket
Certifications	Produced in accordance with SAE J514

Product Specification and Ordering Information

Example: AN-48A-04

Part No.	Size (inches)	Material
AN-48A-04	1/4	brass
AN-48A-05	5/16	brass
AN-48A-06	3/8	brass
AN-48A-08	1/2	brass
AN-48A-10	5/8	brass
AN-48A-12	3/4	brass
AN-48A-16	1	brass
AN-48A-20	1 1/4	brass
AN-48A-24	1 1/2	brass
CR-48A-04	1/4	stainless steel
CR-48A-05	5/16	stainless steel
CR-48A-06	3/8	stainless steel
CR-48A-08	1/2	stainless steel
CR-48A-10	5/8	stainless steel
CR-48A-12	3/4	stainless steel
CR-48A-16	1	stainless steel
CR-48A-20	1 1/4	stainless steel
CR-48A-24	1 1/2	stainless steel

Note: All dimensions are in inches and are for reference only
Part numbers ending in "-6" and "-12" cannot be used for a 45° connection

AQ-22 Marine Rudders

- Designed for boat speeds up to 40 knots
- Hydrodynamic shape provides proven performance throughout the designed speed range
- Construction, AQ-22 stainless steel

Dimensions

Product Specifications and Ordering Information

Example: 70RMODEL I

Part No.	A	B	Approximate weight stock per foot-pound/foot	Approximate rudder weight less stock pound	C	D	E	Estimated rudder torque 40 knots (inches/pounds)
70RMODEL I	1.25	15	4.17	19	13.5	6.69	9.81	4400
70RMODEL II	1.5	18	6.01	30	16.5	8.25	12	8100
70RMODEL III	1.75	21	8.18	47	19	9.38	13.38	12200
70RMODEL IV	2.25	24	13.52	82	23.38	11.63	17	22300
70RMODEL V	2.75	30	20.19	125	27	13.38	19.5	34300
70RMODEL VI	4	34	42.71	200	31	15.38	22.38	52200
70RMODEL VII	4.5	38	54.05	275	34.5	17	25	71900

Note: All dimensions are in inches and are for reference only
 Custom rudders are available upon request.
 Rudder torque has been increase 25% to allow for bearing friction.

AQ-22 special features

- Wedge sections, creates positive steering forces for a full range of rudder angles
- Designed to trail or track in the slip stream
- Rudder is cut away to minimize ventilation of the rudder during high speed turns
- Cast in stainless steel to provide the strength and positive steering control

AQ-22 Marine Rudders

Rudder Selection

- Estimate of the maximum operating speed and displacement of the boat must be determined
- The speed at which a boat is typically driven will impact the choice of the rudder size
- A single rudder is required for each propeller
- If a specific length is required, it must be stated when ordering the rudder

Boat Characteristics

Boat Characteristic Reference	AQ-22 Rudders
Assumed speed of 25 knots, 28,000 pounds displacement	
One (1) rudder	70RMODELV
Two (2) rudders	70RMODELIII
Three (3) rudders	70RMODELII
Assumed speed of 33 knots and a 38 foot boat	
One (1) rudder	70RMODELIV
Two (2) rudders	70RMODELII
Three (3) rudders	70RMODEL I

Notes: Numerical value of stock length has been chosen arbitrarily
 Rudder weights are estimated
 Rudder torque is included so that the force required at the tiller arm may be estimated
 Dash lines indicate approximate boat length

Note: All dimensions are in inches and are for reference only

Metric Flanges and Dimensions

Note: D = flange diameter
BC = bolt circle diameter

H = bolt holes x hole diameter
1 inch = 25.4 mm

Example: D 80
BC 55
H 4 x 11
