## Hydrasearch In The Making

Hydrasearch began in the early 1960s from a growing demand for more “think tank” factories near Washington, D.C. to support our national defense. From hydraulic research and design, to our most recent acquisition of venting solutions, our product offering has been an expanding effort to fulfill the needs of our customers. We are proud to manufacture a trusted product line for almost 60 years.

### 1962

Hydrasearch founded by Willard G. Triest in Annapolis, MD, specializing in the research and manufacturing of hydraulic valves and component devices.

### 1970s

Hydrasearch's primary focus during the 70s was designing hydraulic control systems for the government and fueling at sea equipment for the US Navy.

### 1994

Hydrasearch relocated to Stevensville, Maryland. The new 30,000 square foot facility allowed Hydrasearch to merge its inventory, machining, testing and offices under one roof.

### 1960s

Hydrasearch is acquired by Dixon Valve & Coupling Company, a leading innovator in the hose coupling industry for over 100 years.

### 1980s

Hydrasearch developed and tested a new line of hose and fittings that solved many ongoing leakage problems. This led to Hydrasearch becoming a Qualified Product Listing (QPL) vendor in 1989 by Naval Sea Systems Command.

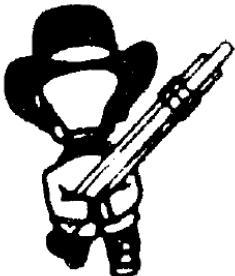

### 1995

Hydrasearch purchased Technical Products. This acquisition established Hydrasearch as an even larger supplier to the military market.

**Technical Products**  
A Division of Hydrasearch

# Hydrasearch In The Making

## 1998

Hydrasearch acquired the field attachable hose and fitting product line from Deutsch Metal Components of Gardena, CA. The product line consists of hose assemblies and components.

## 2010

Hydrasearch merged with its sister company Buck Algonquin, under the name Hydrasearch Company, Inc. This merger brought an expansion into the maritime market.

## 2016

Hydrasearch acquired Arctic Steel and Pro-Mar Maritime Venting Solutions. These acquisitions expanded our product offering into the workboat industry.

## 2000

Hydrasearch received its first ISO 9001 certification. The registration is recognized as a measure of a supplier's quality assurance process.

## 2016

Hydrasearch relocated to its current facility within the same business park in Stevensville, MD. The facility is 65,000 square feet allowing for increased efficiency and production.

## Hydrasearch Capabilities

Founded in 1962, Hydrasearch is a US based manufacturer of specialized maritime/aerospace components, fluid transfer related systems and custom machined parts. We have extensive experience in defense and commercial applications. We support both the immediate needs of daily operational logistics and the long-term dependability required to satisfy OEM production.

### Advantages of buying Hydrasearch

#### Quality Assurance

Hydrasearch maintains a mature quality control process that puts us ahead of the competition. In addition, we are a certified International Organization for Standardization (ISO 9001: 2015) company. To ensure our quality we are continuously improving our equipment, processes and training.

#### Engineering Support

Hydrasearch has an extensive support system that includes the following programs:

- 3D printing and 3D scanning
- Articulating borescope
- CAD software support
- Coordinate Measuring Machines (CMM)
- Finite element analysis
- Flow simulation
- Comprehensive quality department
- Niton x-ray fluorescence analyzer
- Modern machine shop
- Rapid prototyping
- Solidworks capabilities

# Hydrasearch Capabilities

## A Knowledge Base Built on Experience

Since our inception, Hydrasearch has focused on the design, development and manufacturing of fluid-conveying products and systems. Our first products were specially designed hydraulic systems and fueling at sea systems for the US Navy. Our in depth knowledge of hose fitting designs for demanding applications soon led to the development of innovative hose and couplings and related products that are now part of many diverse fluid handling and fluid power systems.

We have successfully built our business through strict adherence to product design and quality control, interchangeability with existing products, close attention to customer requirements, close attention to delivery needs and competitive pricing. As a result, we have steadily increased our market presence supporting a full range of equipment from helicopters and jets to missiles and rockets.

## Flexible Fluid System Solutions for the Aerospace Industry

Hydrasearch is a leading supplier of fluid system components to the military and commercial aerospace industry. We manufacture a complete range of fitting configurations for a wide variety of hose types, including low, medium and high pressure rubber hose, lightweight medium pressure rubber hose, and medium and high pressure TFE hose. Customers around the world use our products because of the superior design of Hydrasearch hose assemblies to make their flexible fluid systems.

## Quality Control Ensures Reliability

Hydrasearch Company, LLC. is ISO 9001: 2015 certified. The scope of our registration covers the higher Quality Management System for the design, development, manufacture and distribution of fluid systems and components for Military and Commercial customers. Calibration of measuring tools and equipment for final acceptance are traceable to the National Institute of Standards and Technology (NIST) and meet the requirements of ANSI/NCSL Z540-1.

Supplying products that meet strict design and quality standards is only part of our mission. At Hydrasearch, we strive to establish and maintain close relationships with each of our customers. We place an importance on paying attention to details as the needs of our customers depend upon it. When your requirements call for more than a "standard" product, our sales team will work to satisfy those needs.

# Legal Policy Information

## Limited Warranty Policy

### Right to warn

**⚠** In order to ensure proper function of products, it is strongly recommended that each part is inspected and serviced monthly. Inspection should include, but is not limited to, visible damage, excessive wear and proper bonding. Failure to properly maintain your product may result in catastrophic failure and/or loss of life.

### Limited Warranty

Hydrasearch Company, LLC (herein called "Hydrasearch") warrants the products described herein, and manufactured by Hydrasearch to be free from defects in material and workmanship for a period of one (1) year from the date of invoice by Hydrasearch under normal use and service. Hydrasearch's sole obligation under this warranty is limited to either repairing or replacing, as hereinafter provided, at its option, any product found to Hydrasearch's satisfaction to be defective upon examination by it, provided that such product shall be returned for inspection to Hydrasearch's factory within thirty (30) days after receipt.

The repair or replacement of defective products will be made without charge for parts or labor. This warranty shall not apply to parts or products not manufactured by Hydrasearch, the warranty of such items being limited to the actual warranty extended to Hydrasearch by its supplier.

This warranty shall not apply to any product which has been subject to abuse, negligence, accident or misapplication or to any product which has been altered or repaired by anyone other than Hydrasearch nor to normal maintenance services and the replacement of service items (such as washers, gaskets and lubricants) made in connection with such services.

To the extent permitted by law, this limited warranty shall extend only to the buyer and any other person reasonably expected to use or consume the goods who is injured in person by any breach of warranty. No action may be brought against Hydrasearch for an alleged breach of warranty unless such action is instituted within one (1) year from the date the cause of action accrues. This limited warranty shall be construed and enforced to the fullest extent allowable by applicable law.

Other than the obligation of Hydrasearch expressly set forth herein, Hydrasearch disclaims all warranties, expressed or implied, including but not limited to any implied warranties of merchantability or fitness for a particular purpose, and any other obligation or liability. The foregoing constitutes Hydrasearch's sole obligation with respect to damages, whether direct, incidental or consequential, resulting from their use or performance of the product.

## Proposition 65 Warning

As a company that may sell or distribute Hydrasearch Company, LLC ("Hydrasearch") products to California consumers or to other persons or entities that may sell such items to California consumers, Hydrasearch is obligated to notify you of the following:

Hydrasearch is in compliance with the California Safe Drinking Water and Toxic Enforcement Act of 1986 and its supporting regulations ("Proposition 65"), as it provides warnings that comply with a 2015 court-approved settlement. All Hydrasearch products are shipped in cartons with the following warning:

"WARNING: This product contains lead, a chemical known to the State of California to cause cancer and birth defects or other reproductive harm."

If you sell or distribute Hydrasearch products to California consumers, or to other persons or entities that may sell such items to California consumers, in quantities fewer than a full carton, you must provide this warning to each customer, either by labeling each unit with the above warning, by posting a sign at the point of sale, or by another method.

If you sell Hydrasearch products online to California consumers, you should display this warning message on the product display page, by a clearly marked hyperlink on the product display page, or otherwise prominently displayed to the purchaser before the purchaser completes the purchase of the product.

Hydrasearch will defend and indemnify you if there is a claim made under Proposition 65 for listed chemicals being contained in its products, so long as you have provided the warning per the instructions above. If you sell Hydrasearch products without the warnings we have provided, you are at risk of enforcement and significant penalties.

If you would like more information about the chemicals contained in Hydrasearch products, please visit our website at [www.hydrasearch.com](http://www.hydrasearch.com). Many product display pages contain information about the chemicals contained in our products.

Hydrasearch products made of brass may not be sold to California consumers unless such fittings either contain less than 300 ppm of lead when analyzed pursuant to the EPA test method 3050B or equivalent or they are sold or distributed with a clear, reasonable and conspicuous warning. So long as it is prominently displayed on the product or the packaging of the product, the above warning complies.

Should you need further explanation or assistance in complying with this notice, please do not hesitate to contact us at [compliance@hydrasearch.com](mailto:compliance@hydrasearch.com).

# Legal Policy Information

## Return Policy

Contact your Hydrasearch Company, LLC customer service representative (information below) to obtain a Return Material Authorization (RMA) form. Original invoice number, purchase order number and date must be provided. Product returned without an RMA number may be refused or returned at the customer's expense. Hydrasearch is not liable for unauthorized returns.

### Return Material Authorization (RMA)

- Authorization must be obtained prior to return
- RMA expires thirty (30) days from date issued
- One carton must include a copy of the RMA form to ensure prompt evaluation and possible credit on return
- If credit is applicable, credit may take up to thirty (30) days from receipt of the returned product(s)
- Returned merchandise transportation must be prepaid
- Merchandise must be securely packaged to avoid damage during transit
- All cartons must be marked with authorized RMA number (unmarked shipments will be refused by our receiving department)
- Returned goods should be shipped to the following address:

Hydrasearch Company, LLC

Returns Dept. RMA #\_\_\_\_\_

203A Log Canoe Circle

Stevensville, MD 21666

### Nonconforming Products

- All product will be inspected and processed by our quality department for disposition
- Product(s) shipped in error and/or product(s) deemed nonconforming will be credited at the invoice price paid including freight charges for these items

### Restocking/Unwanted Products

- All product will be inspected and processed by our quality department for disposition
- Restocking charge will apply at a minimum of 25% for all product returned for any other reason than Hydrasearch shipping and/or nonconforming errors
- Product(s) may not be returned unless they are in marketable condition. Any cost incurred to put product(s) in marketable condition will be charged to the customer.
- Product returned damaged/broken will be credited at a scrap value only
- Product returned to Hydrasearch must be prepaid freight at the responsibility of the customer
- Non-inventory product may or may not be authorized for return, based solely on the inventory requirements of Hydrasearch
- Special order product(s) or product that do not have standard requirements, are not eligible for return (*unless product is found to be nonconforming by our quality department*)
- Shaft Couplings must be in original, sealed cartons and in salable condition

### Claims

- Claims for damage or loss in transit must be made by customer directly against the carrier. Hydrasearch is not responsible for freight damage
- Photographic evidence is required for all claims
- All claims for defective product or deficient orders must be made in writing by customer within thirty (30) days of receipt

# Using This Catalog

## Dimensions

All dimensions shown are approximate and are to be used for reference only. Please contact Hydrasearch Sales at 410.643.8900 when exact dimensions are required.

## Accuracy of Information

Every effort has been made to ensure the accuracy of the information in this catalog. While we cannot assume liability for any errors or omissions, we encourage you to contact our Marketing Department ([marketing@hydrasearch.com](mailto:marketing@hydrasearch.com)) with such information, so that the necessary changes can be made.

## Pricing and Availability

Please contact Hydrasearch Sales at [defense@hydrasearch.com](mailto:defense@hydrasearch.com) for pricing and availability information.

## Ordering Information

When ordering, please note that each part number is broken down into seven (7) elements. See figure and key descriptions for explanation of a typical hose assembly part number.

**A**

**Type of Hose** - Hose type is designated by a two digit number, as follows:

- 93 = low pressure, rubber
- 94 = medium pressure, rubber
- 88 = high pressure, rubber
- 79 = electrically conductive TFE inner liner with braided stainless steel cover
- 36 = lightweight medium pressure, rubber

**B**

**Type of Fitting** - Fitting type is designated by a single letter, as follows:

- B = field attachable (reusable fittings)
- D = swivel nuts with lock wire holes
- F = firesleeve - silicone
- H = firesleeve - silicone with lock wire holes in swivel nuts
- J = chafe guard - spiral TFE
- L = chafe guard with lock wire holes in swivel nuts
- X = internal support spring
- Y = aluminum with fire sleeve
- Z = internal support spring with lock wire holes in swivel nuts

**Note:** For TFE hose assemblies, confirm L, X and Z before using. Special number may apply.

**C**

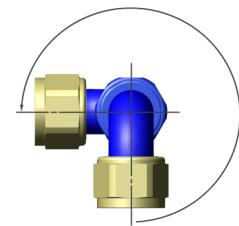

**Hose Fitting Combinations** - Hose fitting combinations are designated by a two digit number (see hose fitting combination chart on page 10).

# Using This Catalog

**D**

**Angular Rotation of Hose Fittings** - Place fitting nearest you at a position of 0° (see illustration). Measure counterclockwise to the desired position of the rear fitting. When the angle between fittings desired is position 0° to position 0°, specify 000.

**E**

**Hose Assembly Size** - Hose assembly size is designated by a two digit number (see chart).

**Note:** Size code  $\frac{3}{16}$  is 34, which consists of a  $\frac{1}{4}$  hose with  $\frac{3}{16}$  fittings.

Fitting Tube Size	Size Code Number
$\frac{1}{8}$	02
$\frac{3}{16}$	03 (B)
$\frac{1}{4}$	04 (E)
$\frac{5}{16}$	05 (F)
$\frac{3}{8}$	06 (G)
$\frac{1}{2}$	08 (H)
$\frac{5}{8}$	10 (J)
$\frac{3}{4}$	12 (K)
1	16 (M)
$1\frac{1}{4}$	20
$1\frac{1}{2}$	24
2	32

**F**

**Fitting Material** - Fitting material is designated by one of the following letters:

**Rubber and Lightweight Medium Pressure**

D = all aluminum

F = steel with aluminum sockets

X = steel with aluminum sockets and firesleeve

R = all aluminum with rubber abrasion-resistant sleeve\*

P = steel with aluminum sockets and rubber abrasion-resistant sleeve\*

\*To order rubber guard, type of fitting designation is J, and fitting material is either R or P.

**TFE Hose Assemblies**

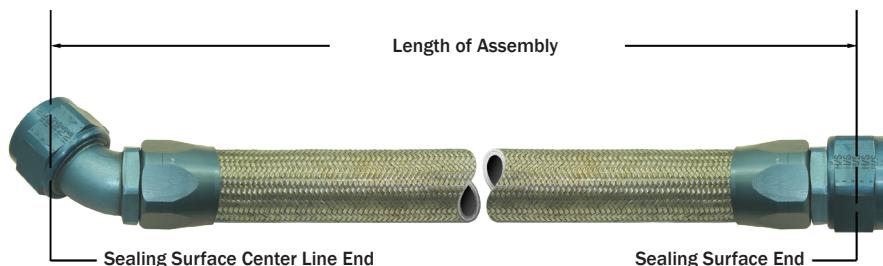

C = stainless steel fittings

K = chafe guard TFE AS1291 Code A

Z = stainless steel fittings with silicone firesleeve

**G**

**Length of Assembly** - Hydrasearch hose assemblies are available in  $\frac{1}{8}$  inch increments. The first three digits indicate length in inches. The fourth digit indicates eighths of an inch. (The example and key description on page 8 specifies an assembly  $18\frac{1}{2}$  inch in length.) Lengths are specified from centerline to centerline of angular fittings, and from end-of-sealing to end-of-sealing surface for straights.

# Hydrasearch Hose Fittings Code Chart for Hose Assemblies

All combinations are not standard in all sizes. The above chart contains all common combinations of fittings listed in this catalog. Special combinations are available upon request.

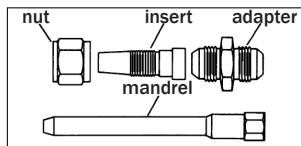

# How to Assemble Rubber Hose Assemblies

## Low & Medium Pressure Straight Fittings

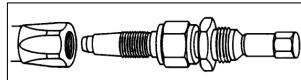

Low pressure MS27404 fittings with MIL-DTL-5593 hose. Medium pressure MS24587 fittings with MIL-DTL-8794 hose.

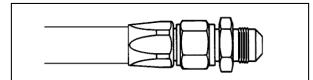

**1.** After cutting hose squarely to proper length (**DO NOT remove cover**), screw hose into socket (*left hand thread*) until it bottoms. Back out hose  $\frac{1}{4}$  turn.

**2.** Assemble insert and nut on adapter and slide onto mandrel. Tighten nut until assembly is rigid, (sizes 16 and over do not require a mandrel).

**3.** Lubricate hose ID and the insert of the sub-assembly (step 2) with lubricating oil or light grease.

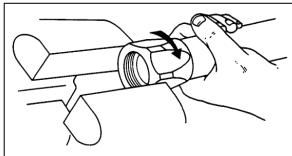

**4.** Screw sub-assembly (step 1) into hose and socket (step 1). Leave  $\frac{1}{16}$  inch clearance so nut is free to swivel.

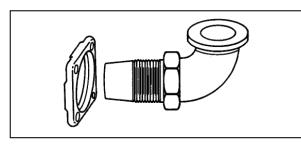

**Clean, Inspect and Test.** Clean the hose assembly by blowing out with air. Inspect the hose by looking through the assembly for any possible obstructions or foreign matter. Pressure test at proof pressure, see page 12 or 14, as applicable.

## Medium Pressure Elbow Fittings

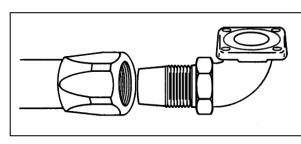

For use with MIL-DTL-8794 hose.

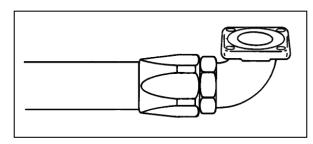

**1.** After cutting hose squarely to proper length with hacksaw or cutting wheel (**DO NOT remove cover**), screw hose into socket (*left hand thread*) until it bottoms. Back out hose  $\frac{1}{4}$  turn.

**2. Flange Type Ends Only.** Assemble flange over threaded end of insert. Insert shoulder must seat in counter bore of flange. **Note:** Step 2 not required for flared/flareless fittings.

**3.** Lubricate hose ID and the insert threads with lubricating oil or light grease.

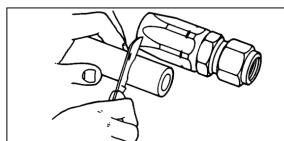

**4.** Using hex on elbows, screw insert sub-assembly into hose and socket (step 1) until insert hex bottoms against socket. **Note:** On size -32 screw insert into hose and socket until binding occurs. Unscrew and relubricate and continue screwing until insert bottoms against socket.

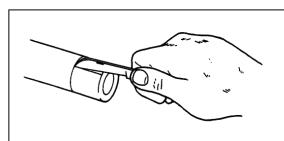

**Clean and Test.** Clean hose assembly by blowing out with air. Pressure test at proof pressure, see page 14.

## High Pressure All Fittings

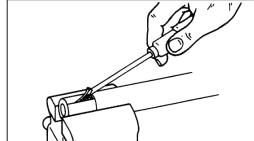

For use with MIL-DTL-8788 hose.

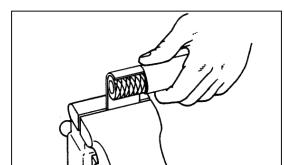

**1.** Cut hose squarely to proper length with hacksaw or cutting wheel. Match end of hose with notch in hex of socket, measuring back from end of hose the same distance. Cut around hose through cover to wire braid, away from notch in socket.

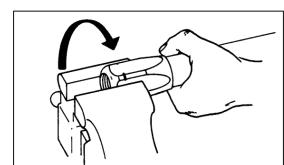

**2.** Cut lengthwise from cut (step 1) to end of hose.

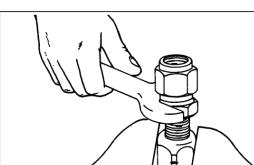

**3.** Pry up the cover at intersection of the two (2) cuts with a screw driver.

**4.** Strip off the cover with pliers or vise.

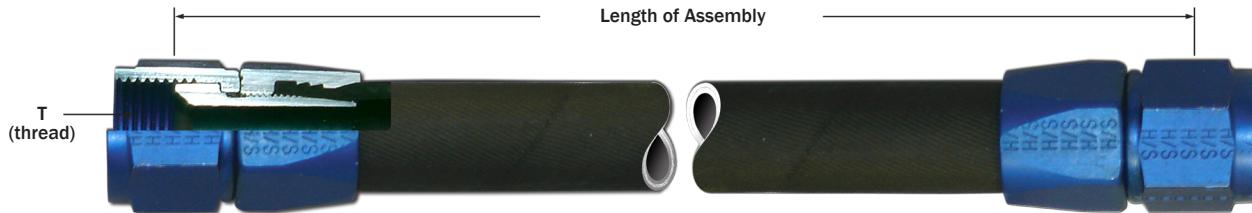

**5.** Screw the hose into the socket (*left hand thread*) until the hose bottoms. Back out hose  $\frac{1}{4}$  turn.

**6.** Lubricate insert and hose ID with oil. Insert is then threaded into socket and hose until the hex of the insert just touches the socket.

**Clean and Test.** Clean hose assembly by blowing out with air. Pressure test at proof pressure, see page 19.

# Low Pressure Rubber Hose Assemblies

Hydrasearch AN-6270 low pressure hose assemblies can be used as flexible connections on low pressure or vacuum systems such as aircraft instrument systems (see SAE-AIR797). It is especially suited for low pressure hydraulic fluids, engine oils, fuels and coolant fluids. Hydrasearch low pressure hose is used for applications with operating pressures up to 250 PSI, and having a temperature range of -67°F to +158°F.

## Specifications for Fittings

**Materials:** Aluminum  
2014-T6 per SAE-AMS 4133 and  
2024-T6 or 2024-T851  
per SAE-AMS-QQ-A-225/6

**Finish:** Aluminum Alloy,  
anodized in accordance with  
MIL-A-8625, Type II.

## Military Specifications

Fitting: MIL-DTL-38726 & MS27404

Hose: MIL-DTL-5593

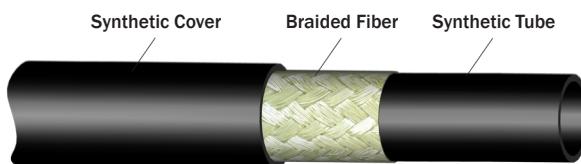

Hose Assembly: AN6270

## Example of Military Part No.

AN6270-4D-0204

Hydrasearch Part No.	AN Part No.	Hose size	Hose ID	Thread size
93B0100002D0000	AN6270-2D-L	1/8	0.375	5/16 - 24

93B0100006D0000	AN6270-6D-L	3/8	0.375	9/16 - 18
93B0100008D0000	AN6270-8D-L	1/2	0.500	3/4 - 16
93B01000010D0000	AN6270-10D-L	5/8	0.625	7/8 - 14

## Hydrasearch Low Pressure Hose (in accordance with MIL-DTL-5593)

### Identification

Black cover with yellow dot and dash stripe running parallel to bore of hose to indicate natural lay of hose after installing. The letters LP in the stripe indicate low pressure.

The specification PIN, cure date, manufacturer's CAGE code and manufacturer's name or trademark form a part of the lay line and are repeated every 12 inches.

### Operating Systems

- A. Severe vibrating and flexing.
- B. Resistant to engine oil and cleaning solvent externally.
- C. Internal and external temperatures from -67°F to +158°F.
- D. Internal fluids, hydraulic fluids, engine oil, fuel, coolant fluids, etc.

### Construction

- A. Inner Tube: Oil and fuel resistant synthetic compound.
- B. Reinforcement: Single cotton braid embedded in bonding material.
- C. Outer Cover: Oil and fuel resistant synthetic compound.

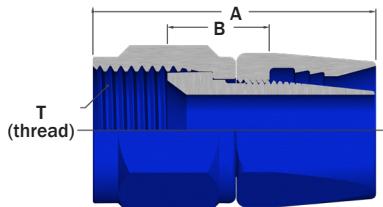

Part No.	Hose size	Inside diameter	Max outside diameter	Max working pressure (PSI)	Proof test pressure (PSI)	Min burst pressure (PSI)	Min bend radius	Hose weight (lbs/ft)
3H-5593-02	1/8	0.125	0.375	300	600	2000	1	0.050
3H-5593-03	3/16	0.188	0.438	250	500	1700	1	0.065
3H-5593-04	1/4	0.250	0.500	200	400	1250	2	0.075
3H-5593-06	3/8	0.375	0.625	150	300	1000	2	0.094
3H-5593-08	1/2	0.500	0.781	150	300	600	3	0.180
3H-5593-10	5/8	0.625	0.906	150	300	600	3	0.210

Note: All dimensions are in inches and are reference only. Variations from these dimensions, on actual parts, may occur as the result of engineering revisions.

# Medium Pressure Rubber Hose Assemblies

Hydrasearch MS28741 medium pressure hose assemblies can be used as flexible connections on medium pressure power plant and airframe applications (see SAE-AIR797). They are especially suited for medium pressure hydraulic fluids, engine oils, fuels and coolant fluids. Hydrasearch medium pressure hose is used for applications with operating pressures up to 3000 PSI, and having a temperature range of -65°F to +250°F. See MIL-DTL-8794 for specific temperature ranges.

### Specifications for Fittings

**Materials:** Aluminum and steel in accordance with Table 1 of MIL-DTL-5070.

**Finish:** Aluminum Alloy, anodized in accordance with MIL-A-8625, Type II, Class 2.

Steel, cadmium plated (zinc plating option per ASTM B633 Type II, Fe/Zn 5) per SAE-AMS-QQ-P-416, Type II, Class II.

**Sizes 3-6** are steel with aluminum sockets.  
**Sizes 8-32** are all aluminum.

### Military Specifications

**Fitting:** MIL-DTL-5070

**Hose:** MIL-DTL-8794

**Hose Assembly:** MIL-DTL-8795

### Example of Military Part No.

**MS28741-4-0204**

Hose assembly, flared, straight fittings, 20 1/2 inch in length, for 1/4 inch tubing.

### Identification

Black cover with yellow line running parallel to bore of hose to indicate natural lay of hose after installing.

The specification PIN, cure date, manufacturer's CAGE code and manufacturer's name or trademark form a part of the lay line and are repeated every 12 inches.

### Operating Systems

- A. Severe vibrating and flexing.
- B. Resistant to engine oil and cleaning solvent externally.
- C. Internal and external temperatures from -65°F to +250°F.
- D. Internal fluids, hydraulic fluids, engine oil, fuel, coolant fluids, etc.

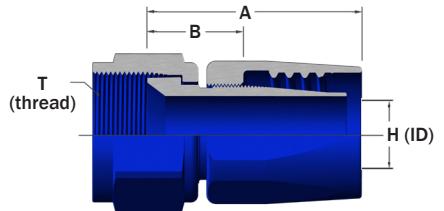

### Construction

- A. Inner Tube: Oil and fuel resistant synthetic compound.
- B. Reinforcement: Single wire braid and single cotton braid.
- C. Outer Cover: Oil and fuel resistant synthetic impregnated cotton braid.

# High Pressure Rubber Hose Assemblies

Hydrasearch MS28759, flared, high pressure hose assemblies can be used as flexible connections on high pressure power plant and airframe applications (see SAE-AIR797). They are especially suited for high pressure hydraulic fluids, engine oils, fuels and coolant fluids. Hydrasearch high pressure hose is used for applications with operating pressures up to 3000 PSI, and having a temperature range of -65°F to +275°F (see MIL-DTL-8788 for specific temperature ranges). See the chart to the immediate right for other MIL specification assemblies.

## Specifications for Fittings

**Materials:** Aluminum and steel in accordance with Table I of MIL-DTL-8789.  
**Finish:** Steel, cadmium plated in accordance with AMS-QQ-P-416, Type II, Class 3. Aluminum Alloy, anodized in accordance with MIL-A-8625, Type II, Class 2.

All fittings are steel with aluminum sockets.

## Military Specifications

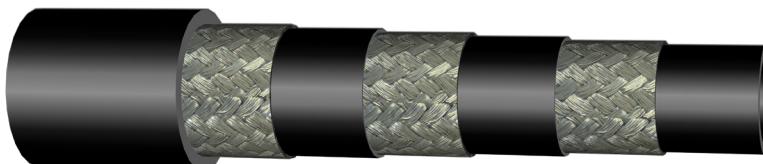

**Fitting:** MIL-DTL-8789  
**Hose:** MIL-DTL-8788  
**Hose Assembly:** MIL-DTL-8790

## Example of Military Part No.

**MS28759-40204**

Hose assembly, flared, straight fittings, 20 1/2 inch in length, for 3/4 inch tubing.

# Medium Pressure TFE Hose Assemblies

## Specifications for Fittings

**Materials:** Corrosion resistant steel in accordance with MIL-DTL-25579.

Aluminum option available upon request.

**Finish:** Passivated per SAE-AMS2700.

**Design:** Flared and flareless fittings.

Sizes -3 through -8 are forged design.

Sizes -10 through -16 are bent tube design.

Hydrasearch field-attachable elbow fittings are adjustable in angular rotation through 360°.

## Military Specifications

Fitting: MIL-DTL-27272

Hose: MIL-DTL-27267

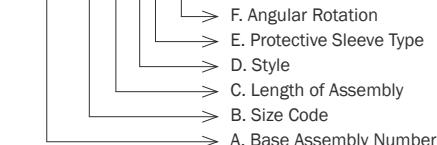

Hose Assembly: MIL-DTL-25579, MS8000 - MS8004

Hose assemblies may be ordered factory assembled. Bulk hose and fittings are available for customer fabricated hose assemblies. Standard hand tools can be used for low volume assembly.

Medium pressure TFE fittings are available in a complete range of sizes and styles including straights, 45°, and 90° elbows, with flared, flareless and flanged type connections. Size -03 fittings adapt to size -04 hose and are identified by either -3/-4 or 34. Reuse of sleeves is not recommended.

## Example of Military Part No.

MS8000-E-185-F-A-270

### A. Base Assembly Number

MS8000 flared to flared  
MS8001 flareless to flareless  
MS8002 flared to flanged  
MS8003 flareless to flanged  
MS8004 flanged to flanged

### B. Size Code

B= -3/-4	H= -08
E= -04	J= -10
F= -05	K= -12
G= -06	M= -16

### C. Length of Assembly

The first two digits indicate inches. The third digit indicates fraction of an inch in eighths.

### D. Style

Fitting configuration and material (see applicable MS specification).

### E. Protective Sleeve Type

Protective sleeve type (as required, see MS sheet). Leave blank if not required.

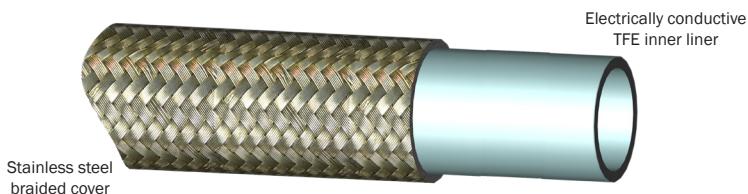

### F. Angular Rotation

Angular rotation of fittings in degrees.

## High Pressure TFE Hose Assemblies are available upon request.

Fitting: MIL-DTL-83296 Hose: MIL-DTL-83298

## Hydrasearch Medium Pressure TFE Hose (in accordance with MIL-DTL-27267)

Hydrasearch medium pressure hose is used for applications in aerospace hydraulic and pneumatic systems with operating pressures up to 1500 PSI, and having a temperature range of -65°F to +450°F.

## Unlimited Shelf Life

HS Part No.	Size No.	Hose size	Nominal hose ID	Nominal hose OD	Max operating pressure (PSI)	Min proof pressure (PSI)	Min burst pressure (PSI)	Min high temp burst pressure (PSI)	Min bend radius	Approx. weight (lbs/inch)

3H-379-16	-16	1	0.875	1.109	1250	2500	5000	3500	7.38	0.0437

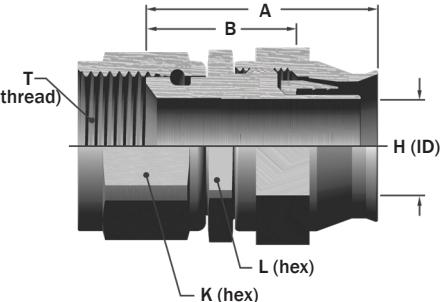

Note: All dimensions are in inches and are reference only. Variations from these dimensions, on actual parts, may occur as the result of engineering revisions.

Hydrasearch TFE hose is unaffected by most aircraft or missile fuels, oils, alcohols, acids, alkalies, coolants, solvents, oxidizers, propellants and high temperature steam used in most aerospace applications. The smooth extruded TFE tube is non-adhesive and has low fluid friction. Additional strength is provided by the tightly braided layers of wire reinforcement.

# Lightweight Medium Pressure Hose Assemblies

Hydrasearch lightweight hose assemblies can be used as flexible connections in medium pressure airframe applications where flexibility, weight and fire resistance are important. Hydrasearch lightweight hose is used for applications with operating pressures up to 1000 PSI, and having a temperature range of -65°F to +250°F (See MIL-DTL-83797 for specific temperature ranges). Not recommended for hydraulic impulse applications or vacuum applications without internal support spring.

## Specifications for Fittings

**Materials:** Sizes 3,4,5 are steel insert assemblies with aluminum sockets. Sizes 6 and up are all aluminum. Steel and Aluminum are to be in accordance with Table I of MIL-DTL-83798.

**Finish:** Aluminum Alloy, anodized in accordance with MIL-A-8625, Type II, Class 2. Steel, cadmium plated (zinc plating option per ASTM B633 Type II, Fe/Zn 5) in accordance with AMS-QQ-P-416.

## Military Specifications

**Fitting:** MIL-DTL-83798  
**Hose:** MIL-DTL-83797  
**Hose Assembly:** MIL-DTL-83796

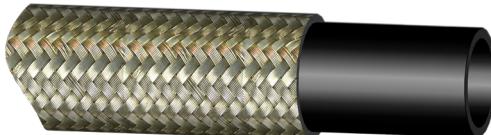

## Example of Military Part No.

M83796/1E185A

Hose assembly, flared, straight fittings, 18  $\frac{5}{8}$  inch in length, for  $\frac{1}{4}$  inch tubing, cadmium plated steel with aluminum sockets.

Hydrasearch Hose Assembly Part No.	Hose size	T Thread size

## Identification

Stainless steel wire braid outer cover band with the specification PIN, cure date, manufacturer's CAGE code and manufacturer's name or trademark.

## Applications

Aircraft power plant and airframe oil and fuel lines. Hydraulic applications must have Hydrasearch approval.

## Operating Systems

- A. Severe vibrating and flexing.
- B. Resistant to engine oil and cleaning solvent externally.
- C. Internal and external temperatures from -65°F to +250°F.
- D. Hydraulic fluids, engine oil, fuel, coolant fluids, etc.

## Construction

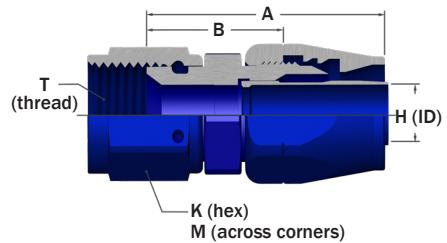

- A. Inner Tube: Synthetic rubber or copolymer.
- B. Reinforcement: Stainless steel wire braid (partial inner braid).
- C. Outer Cover: Full coverage, stainless steel outer braid.

Note: All dimensions are in inches and are reference only. Variations from these dimensions, on actual parts, may occur as the result of engineering revisions.

# Hose Protectants, Coils and Sleeves

## Chafe Guard, Black TFE

Resistant to most oils, fuels and acids. Temperature range of -65°F to +450°F. Conforms to AS1291 Code B.

### Additional Options:

White TFE chafe guard, AS1291 Code A  
Clear FEP chafe guard, AS1291 Code C

## Chafe Guard, Rubber Neoprene

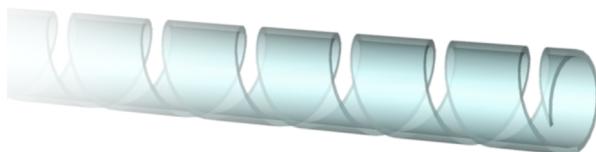

Hydrasearch 148-14593 protective sleeve is a fuel, oil and ozone resistant, Neoprene chafe guard. The sleeve protects hose assemblies from abrasion and scuffing in ground servicing or airborne applications through a temperature range of -65°F to +250°F.

### Chafe Guard Size

148-14593	-6	-8	-10	-12	-14	-16	-18	-20	-22	-24	-26	-28	-30	-34	-36

## Spiral Protective Coil

May be applied to hoses in the field by spirally wrapping or winding around the hose. The natural grab between coils reduces the possibility of entrapped moisture. One size covers hose sizes through -20.

$$\text{Required Inches of Spiral Chafe Guard per Inch of Covered Hose} = \frac{\text{OD of Hose}}{0.190} \times \frac{0.375}{0.75 + \text{GAP}}$$

Installed gap of 0.250 recommended.

### Available Options:

White TFE spiral protective coil is resistant to most oils, fuels and acids. Temperature range of -450°F to +500°F.  
Black Nylon spiral protective coil resistant to most oils, fuels and weak acids. Temperature range of -145°F to +230°F.

Note: All dimensions are in inches and are reference only. Variations from these dimensions, on actual parts, may occur as the result of engineering revisions.

148-14518F	2.63	2.59	3.03	0.78	none

In accordance with AS1072.

Meets FAA TSO C53, TSO C75 and FAA TSO C42 standards.

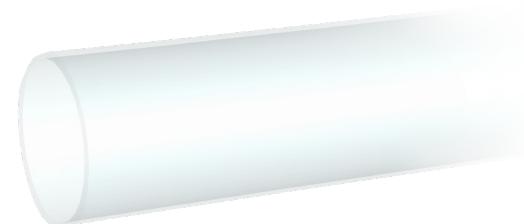

Silicone impregnated fiberglass braid provides increased service life under conditions of ambient temperatures -65°F to 450°F, intermittent to 500°F and is resistant to most aircraft fuels, oils and hydraulic fluids, including Skydrol 500 (a Monsanto trademark).

## Heat Shrink Chafe Guard

FEP clear	3H-379	150-60001	SAE-AMSDTL23053/11-**-C

\* Size indicated here

\*\* Indicates class and size

Provides hose assemblies with skin-tight protection against heat, corrosion, shock, moisture and other conditions. Prolongs the service life of the assembly.

## Internal Support Spring

Spring Assembly Part No.	Spring OD
148-14599	0.630
148-14595	0.890
148-14596	1.140
148-14597	1.398
148-14598	1.796

Used to prevent damage to assemblies subject to mishandling, high vacuum, or tight bend installations. Made of flat helically wound type 302 stainless steel. Sleeves spot welded to end of spring to prevent damage of ID of hoses. Internal Support Springs are supplied as assemblies of fixed length and diameter. Specify type and size of hose, configuration of hose fittings and length of assembly.

Note: All dimensions are in inches and are reference only. Variations from these dimensions, on actual parts, may occur as the result of engineering revisions.
